Preliminary vision of our capital project

The drawing and description provides a preliminary vision of possible components of an overall capital project. We continue to gather input from members to modify or build onto this vision.

A. **Enter and Welcome**. Imagine a redesigned entryway under a shade trellis with down lighting that invites in members and guests. No eyesore of trash cans and shed! An entry path leads into an expanded lobby which allows better space for welcoming all and a more gracious entry into Fellowship Hall.

B. **Rejoice and Move Freely**. A reconfigured and wider main hallway enables much needed accessibility and better flow from Fellowship Hall to the Fireside Room. Modernized and ADA-compliant restrooms sit along a new side corridor leading to existing office space. The redesigned main hallway seamlessly blends with and offers easy access to the courtyard.

C. **Engage in Community**. Picture yourself in a re-landscaped courtyard with elegant, smooth pavers and mature trees and plants designed for outdoor events complete with new lighting and a sound stage for congregational and community events and musical performances.

D. **Learn, Play and Reflect.** An elevator creates an accessible lower-level, which serves as a UU Education Center and Community Daycare benefitting from a moisture barrier and a stabilized lower deck that leads from the Wright Room up to a new children's play space. A remodeled stairway connects up to an outdoor terrace that has direct access to the Fireside room, beautifully landscaped to highlight the wooded terrain, labyrinth, and sunsets on Mt. Tam.
